Hi Gary,

I forgot to mention I also plan to attach sampling data from the sources at the site, collected as part of the ongoing EPA removal action.

Thanks!

Subject: CES Preliminary Assessment References

Hi Gary,

Hope you're doing well! I'm in the process of wrapping up the CES Preliminary Assessment Report and wanted to check with you to be sure you're okay with me attaching references from the EPA OSC website and October 2014 PRP website to the report. For every reference I use in the report, I'm required to attach the document that the information was taken from. The EPA will make the final report available to the public if someone requests it. Here is a list of what I'm planning to attach:

- CES Oil Recycling Permit by Rule
- CES Methylene Chloride Recovery Permit by Rule
- CES MeOH and MEK Permit by Rule
- CES Fact Sheets August and December 2014
- EPA Removal Action Memo
- Storm water sampling results from August 2014 investigation and EPA Removal
- Air samples collected by EPA August 2014
- Trustee Inventory 2010
- EPA PowerPoint from PRP meeting October 22, 2014
- Soil Sampling Results from Kingsbury neighborhood investigation

Let me know if you prefer I don't use any of these references and I will either try to find another way to include the information in the report or take it out altogether.

Thanks for your help!
